

Public Notification

On September 8th, 2025, the RM of Pleasantdale No.398 became aware of damage to the Robb bridge in Division 5 (mile 527 on RR2180 south of Twp Rd 424) in the RM of Pleasantdale No.398. There was significant damage to one side of each end of the bridge possibly caused by large machinery. If anyone has any information on this incident to provide it to the RM office immediately.

In this harvest season, the RM would like to remind motorists and operators of equipment to use care and attention when on RM roads and crossing waterways.

UPDATE: as of September 9th, 2025, the bridge has been repaired. The new signage will soon be installed and will require operators of large equipment to exit their machinery and remove the sign prior to crossing the bridge and then re-install the sign after crossing the bridge in order to clear the bridge and prevent future damage.

The RM would like to thank everyone for their co-operation as this reduces unnecessary expense.
